 [artist_daphnejiyeonjang](https://www.instagram.com/artist_daphnejiyeonjang)

Daphne Jiyeon Jang graduated with a BFA in Sculpture from Gachon University (formerly Kyungwon University) and received an MFA in Contemporary Art Practice from Edinburgh College of Art, The University of Edinburgh.

She has exhibited internationally across Asia, Europe, and the United States, including at Cité Internationale des Arts (Paris), Waterfall Mansion (New York), AHAF (Hong Kong), Art & Design Future Lab (Shanghai), Platform P_ost (Netherlands), Talbot Rice Gallery (Edinburgh), and the Seoul Museum of Art. She has also participated in a number of international residency programs, including Cité Internationale des Arts in Paris and Art Funkl in Manchester, supported by the Gana Foundation.

Jang has presented numerous art-and-technology collaborations with corporate partners, including SONY's 4K projector launch show and projects with the official Korean distributor of Hypervsn hologram technology. In 2019, she garnered significant attention in the UK as a young artist by presenting a large-scale 3D projection artwork in the exhibition *Trading Zone* at the internationally renowned Talbot Rice Gallery. That same year, her work was selected as the best artwork at the 193rd Annual Exhibition of the Royal Scottish Academy, for which she received the RSA Keith Prize.

She later presented the solo exhibition *Naked Babel – Uncivilizations*, a hypermedia art project, at Obscura Gallery, made possible through the largest and first-ever domestic sponsorship by the Korean distributor of Hypervsn hologram technology, proposing a new vision for art and technology. In 2022, she was selected for Paradise Art Lab, where she gained attention for producing a large-scale media façade project in Korea, and further expanded her practice into public art through a media art show at Hwaseong Fortress in Suwon, a UNESCO World Heritage site.

Jang was awarded the John Kinross Scholarship in 2020 and completed a residency in Florence, Italy, supported by the Royal Scottish Academy and the Arts Council Korea in 2022. In 2023, she was selected as an artist for *UnfoldX*, organized by the Seoul Foundation for Arts and Culture, and participated in the 2nd Seoul Convergence Art Festival, *The Way Station to the Moon*, where she presented a new work from her *Uncanny Nature* series, receiving widespread acclaim.

More recently, in an effort to expand immersive art practices, the artist collaborated with pianist Philip Jongdo An as part of the collective Philip & Daphne, presenting a long-term audiovisual project that combined projection mapping, the integration of classical music, and spatial sound technologies. The work was exhibited at MONOM Studio in Berlin through collaborations with 4DSOUND and MONOM in 2025, marking MONOM's first presentation of an audiovisual exhibition integrating classical music, projection mapping, and spatial sound technologies.

Her works have been archived on Google Arts & Culture and are included in the collections of the National Museum of Modern and Contemporary Art Art Bank, the Government Art Bank of Korea, and other institutional collections.
